DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3-12-04 has been entered.

Claims 1-5 and 7 are pending and under consideration.

Inventorship

The "Statement in Support of Petition to Correct Inventorship" by Norimitsu Saito and Ming Zhao filed 3-12-04 are acknowledged. However, the statements only indicate claims 1-4 and 7 are not contributed by either Norimitsu Saito or Ming Zhao but claim 5 is omitted. It is unclear whether claim 5 is solely contributed by Lingna Li or both Norimitsu Saito and Ming Zhao also contribute to claim 5. If Norimitsu Saito and Ming Zhao both contribute to claim 5, it is unclear why Lingna Li becomes the sole inventor of the present invention. Appropriate explanation of the inventorship for claim 5 is required.

Double Patenting

1. Claims 1-5 and 7 of this application conflict with claims 13-18 of Application No. 10/199,757. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one

Art Unit: 1632

application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1-5 and 7 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 13-18 of copending Application No. 10/199,757. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1632

The phrase "said p21 is contained in a liposomal formulation" in claim 5 is vague and renders the claim indefinite. It is unclear whether the p21 protein or a nucleotide sequence encoding the p21 protein is intended for the term "said p21".

6. Claim 1 recites the limitation "the p21 protein" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

No claim is allowed.
